Dear Librarian,

Congratulations on the recent publication of research by members of your institution:

Inverse scattering with partial data on asymptotically hyperbolic manifolds  
By Antônio Sá Barreto (Purdue University) and Raphael Hora (Universidade Federal de Santa Catarina)  
*Analysis & PDE* 8:3

Dynamics of complex-valued modified KdV solitons with applications to the stability of breathers  
By Claudio Muñoz (Université Paris-Sud) and Miguel A. Alejo (Universidade Federal de Santa Catarina)  
*Analysis & PDE* 8:3

As you may know, *Analysis & PDE* is published by MSP, an independent-not-for-profit publisher of mathematical literature. In appreciation of your institution's recent contribution to our publication roster, MSP would like to offer your library two months of free electronic access to *Analysis & PDE*.

Starting on a date of your choosing, your researchers could have access to the entire publication history of *Analysis & PDE*. One of our youngest journals, APDE has been growing significantly in size, readership, and authorship. Its editorial board boasts several National Academy of Sciences members, and board member and contributor Terence Tao was a 2006 recipient of the Fields Medal. Your faculty may find APDE to be a valuable addition to your library collection — certainly there has been some interest among your community already.

We at MSP believe that it is possible to generate and distribute quality scientific research without resorting to unreasonable pricing, mandatory bundles, or other predatory business methods. We hope that, with your help, we can transform academic publishing into an industry that aids rather than preys upon scientific scholarship.

To start your two-month trial or to ask us any questions, please email us at [contact@msp.org](mailto:contact@msp.org). You can also find out more about MSP and our mission at our website, [msp.org](http://msp.org). And for your convenience, we've also included a copy of our 2017 price list, which also includes information about other publications and discount packages that may be of interest to you.

Best regards,

Morgan Johnson  
Communications Specialist, MSP
